Diners

Design Objective

The internet and smartphones are widely available. While modern people love to show what they eat everyday, we can make this share more meaningful. Through people's enthusiasm of the food, the meal are recorded, so that users directly understand the situation of their own food waste to reduce food waste. Diners emphasis more on operability and practicability so that the reduction in food waste is more intuitive and manageable. The points won by user's efforts in every meal play a stimulating role. Unlocking a variety of different food patterns at the same time not only bring the visual beauty, but also with a number of catering enterprises coupons available for exchange, so that the users produce a sense of accomplishment and continue to stick to it. Every day, the "pizza" is a symbol of their efforts to reduce food waste.

About Diners

- The idea is that it helps to gradually reduce the amount of wasted food you eat. Today, 1.3 billion tons of food is wasted every year, and nearly 46 percent of the food waste is on the table. Do you want to be involved in the reduction of food waste? Do you want to stop feeling overwhelmed by every meal you waste?
- Then, it helps you to accomplish those desires and make the “eat up” easier.
- Every time you start a meal, take out your phone and take a picture of the food you enjoy, and then take a picture of it after eating. Diners can automatically calculate the meal you wasted food accounts for a ratio, with the scale conversion for a small pizza on the phone's screen, and complete according to you the number of "pizza" take off to redeem, integrated solution through lock more personalized food icon! Make your “eat up” trip full of fun!

Software function

- Photo: take photos of each meal before and after the meal
- Homepage pattern: the original pattern is "pizza", reflecting the food waste of each meal
- Shop: including "my integral", exchange coupons. Complete "pizza" to unlock other home page patterns
- Share: log on to your friends and share your results in real time
- Mine: look at the record of "pizza" in the past, keeping records of what happens every year, every month, and every day. It also includes multiple accomplishments waiting for users to complete.
