

Refresh

EU project **Resource Efficient Food and dRink for the Entire Supply cHain** to reduce food waste across Europe

REFRESH is an EU research project taking action against food waste. 26 partners from 12 European countries and China are working to contribute to the achievement of Sustainable Development Goal 12.3 of halving per capita food waste at the retail and consumer level and reducing food losses along production and supply chains. REFRESH will contribute to reducing food waste and waste management costs in the EU and develop valorization strategies to maximize the value from unavoidable food waste and packaging materials. The project runs from July 2015 to June 2019.

Visit our website and follow us on social media to learn more, find food waste-related resources, and get involved.
